

How To Build Wooden Book Stands

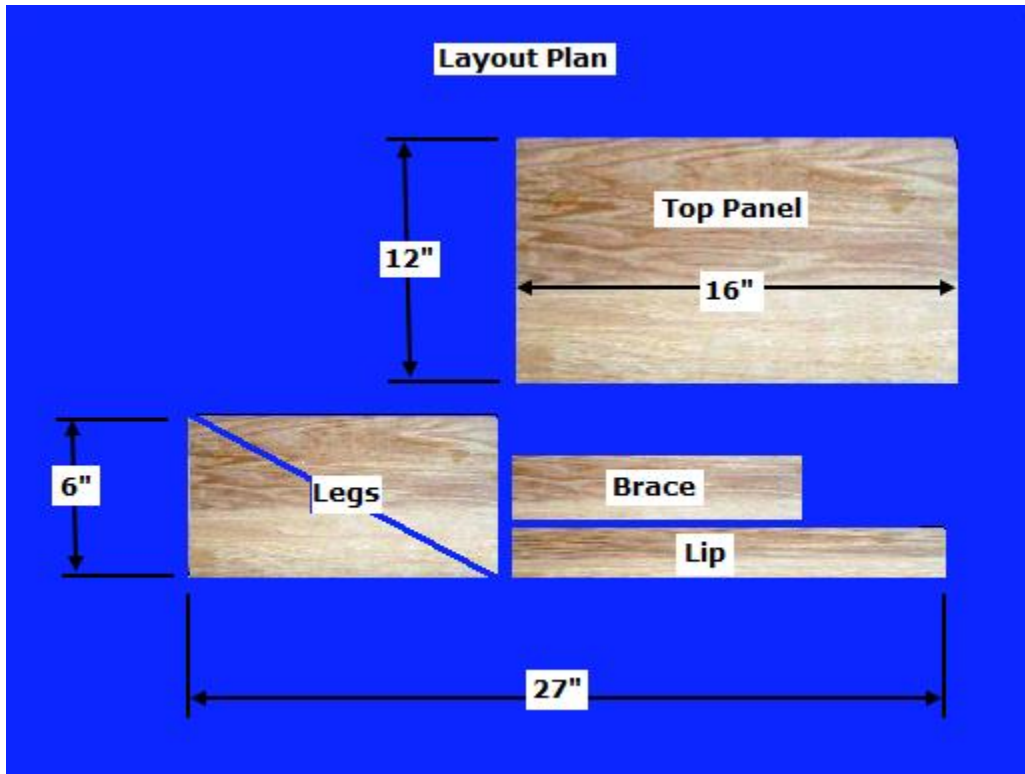

With the right plans, materials, and equipment, you can build this simple Book Stand, as shown here.

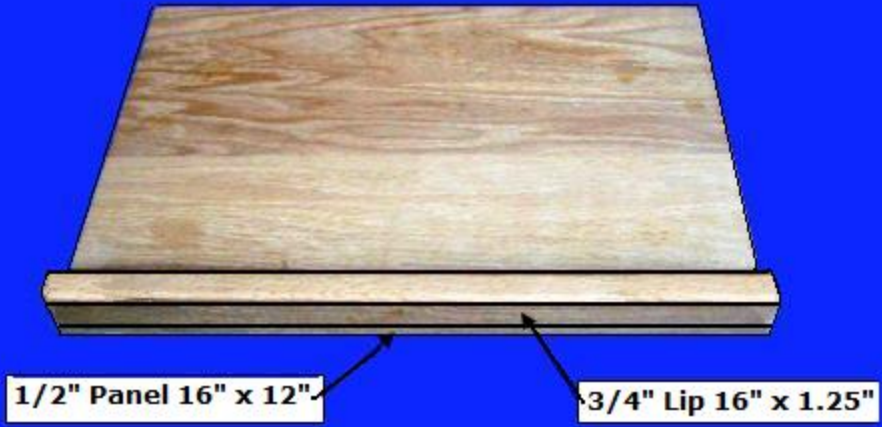

Materials

- 1/2" Hardwood Plywood @ 16" x 12": One piece for the Top Panel
- 3/4" x 6" x 27" Oak or other desired Wood: for all remaining pieces
- 1 1/4" Kregg Screws

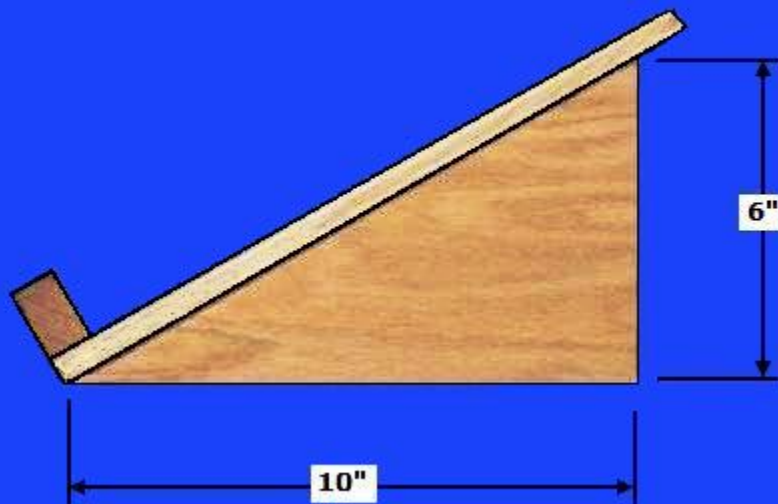

- 1 1/4" Wood Screws
- Sandpaper
- Wood Filler and Glue
- Satin Finish Polyurethane Poly

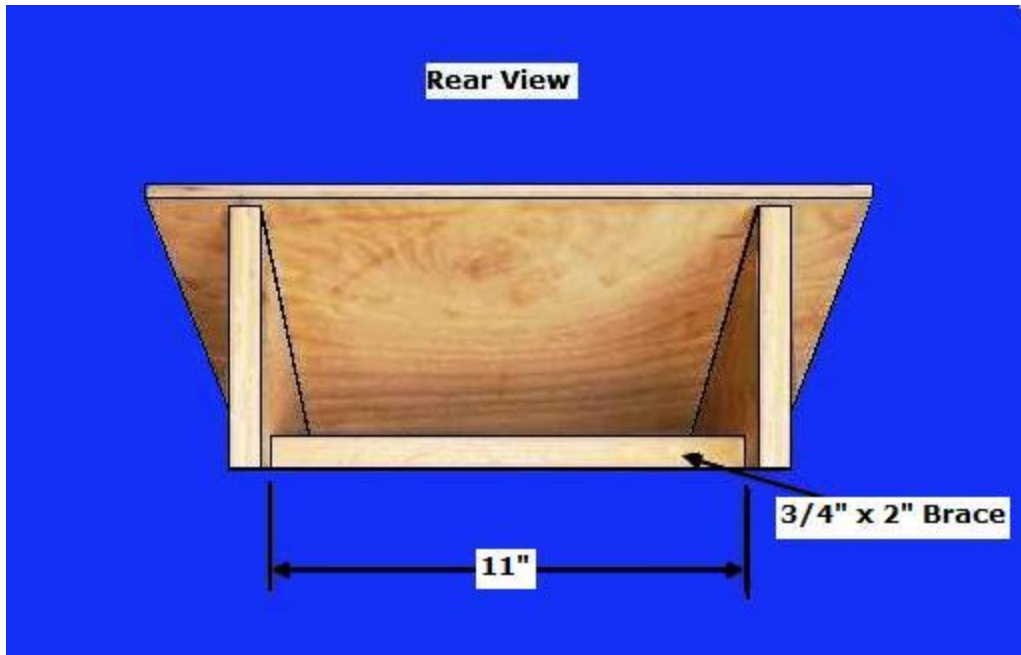

Front View

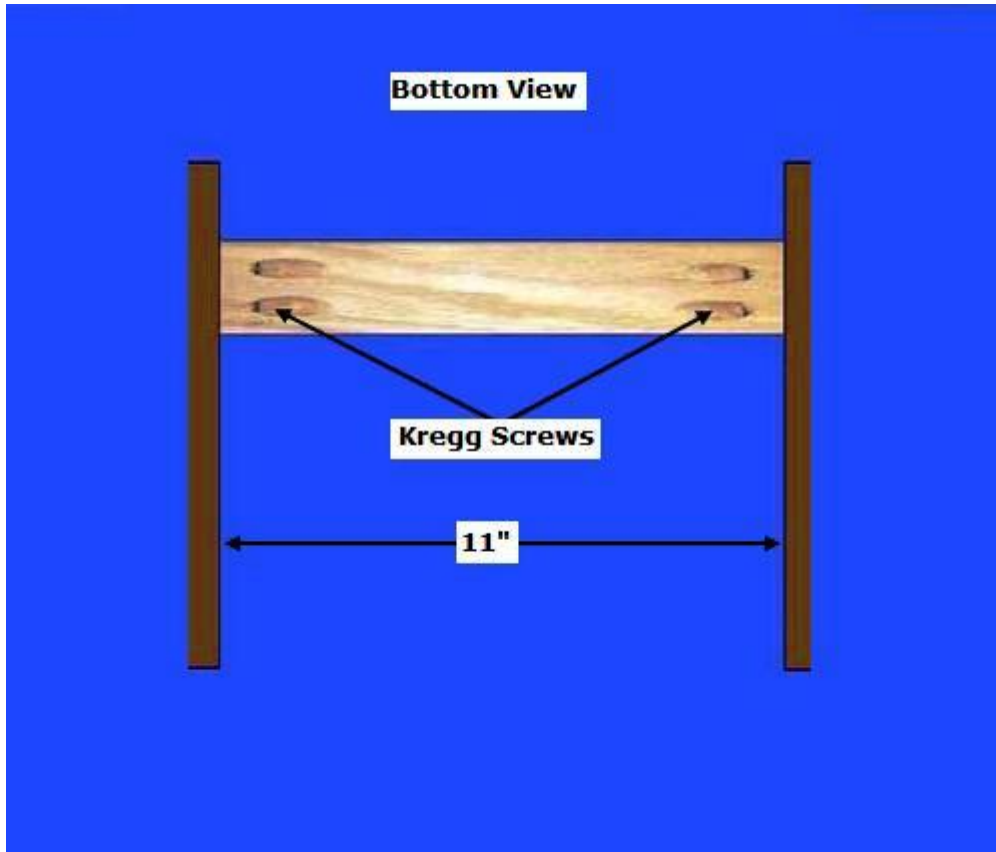

Side View

Step 1: Cut the Book Stand Pieces - Determine the desired size of your Stand

- Select the 1/2" Plywood Panel; cut one piece for the Top Panel @ 12" x 16"
- Select the 3/4" material; cut the two Legs, Brace, and Lip per the dimensions above
- Select all pieces; Sand all pieces

Step 2: Assemble the Stand Pieces - Select all pieces

- Select the Lip and Top Panel; Attach the Lip to the top panel with glue and two wood screws from the bottom as shown above
- Select the two Legs and the Bottom Brace; Connect the two Legs to the Bottom Brace from the bottom side with the Kreg system, as shown above
- Select the Leg and the Top Assembly; Center the assemblies and with glue and screws, attach them together

Step 3: Finish the Shelf - Select the finishing materials

- Fill all holes and cracks with filler; sand all surfaces
- Apply poly
- Enjoy your Book Stand
