

Gun Cabinets

QuickTime™ and a
TIFF (Uncompressed) decompressor
are needed to see this picture.

Senior Project 09'

Gabe Burnett

Base Cabinet

- In a gun cabinet the base is typically where the ammunition is stored as well as handguns and other gun accessories.

QuickTime™ and
TIFF (Uncompressed) dec

Top Section

- The top section of a gun cabinet is where the guns are stored. The Front of the top typically has a glass door and a paneling back.

QuickTime™ and
TIFF (Uncompressed) deco
are needed to see this pi

Paneling

- Adding the paneling is an important part. The Paneling covers that back as well as holding the sides square.

TIFF (Uncompressed) decompressor
are needed to see this picture.

Stock holders

- The stock holders purpose is to align the butts of the stocks so they aren't sitting crooked in the cabinet. Felt or some sort of material are used to be a cushion.

Barrel Aligner

- The Barrel Aligner holds the barrels even to the stock holders below. This keeps the guns straight in cabinet.

Front Door

- The front doors of gun cabinets are typically glass. They are held intact with small 2inch strips with stile and rail cuts.

QuickTime™ and a
