

Help Us To Stop The Air Pollution !!!

We must to decrease the air pollution, one of the biggest issue for humanity.

This problem result of the human's industries, deposit of wastes (sometimes toxic) and overuse of vehicles.

If the air pollution continue to increase; we will have great heath problems, increase of sea level, disappearance of animal and vegetal species. Secondly, the air pollution is the biggest cause of the climat change, it is already the first cause of death in the world, almost one human die every 2,7 seconds because of the pollution. Eighty pourcent of the marine pollution is due to an air pollution.

For stop it, I suggest to never do in car a drive of less 5km. Us, in France, we are the first consumers of Javel Water, we must stop it ; Javel water is a very pollutant chemical.

On our side, we decide to organise a sport tournament with a fee enter, all gains were give to associations for plant more trees .
