

# The deforestation

The deforestation which causes a lot of problems. The human beings destroy trees with palm oil. The palm oil have a lot of fat, it's not good for the healthy. In Indonesia and Malesia are the biggest export of palm oil of the world (80%).

There are a lot of consequences like deforestation. It's effects are the disapearence of ourang-outans. When the human beings destroy trees there are an increase of 15 % of greenhouse effect.

For that,  
we have  
solutions.  
Our  
solutions  
are to  
convince  
the people  
to eat a

spread with no palm oil and to reduce the destroying trees. We must take action. Our action is to reunite people in the village hall at DOURGES the 13th October 2022 at 10 am. The star « Killian Mbappe» invites you.

The goal is to discover the spread with not palm oil. You will be blinfolded and should taste spread. If you like that you should buy it because it's less expansive than Nutella. If we don't stop exporting the palm oil, orang-outans will disappear.
