

The disparition of the polar bear :

The disparition of the polar bear depend at the global warming and the melting ice.

Because the melting ice also changes the rise in the level of the oceans.

For limit the disparition of the polar bear,we should stop polute the atmoshpere for limit the warming up

We aught stop polute the oceans,because the polar bear eat seal and sometimes the seal to wedge in plastic in the water,so the polar bear eat seal and plastic.

We aught stop polute atmoshpere for limit melting ice.

We should create social media campaign for the population polute and recycle dechets.
