

All about Ireland Electronics Companies

As a result of Ireland's favourable business climate, including a relatively low corporate tax rate and a highly educated labour force, numerous multinational electronics corporations have established European headquarters there. In addition, this is a significant factor in Ireland's rise to become one of Europe's leading electronics and electrical goods export in recent years. The following are the most popular types of electrical and electronic goods sold by Irish businesses:

- large and small home machines,
- Computers and other forms of technology,
- equipment for lighting,
- power instruments
