

my favorite place is the courtyard. because we meet our friends and we talk together.

my favorite moment is that there are outings (example: cinema, museum ...)

my tips for college

1. little advice to make the most of all the poses during the day if for example you have an hour without anything between two hours of lessons go permanently do your homework and like that in the evening it will be an hour in less work

2. it so really hard to concentrate the ultimate tip sit down in the front row

3. do not focus too much on school for example In the evenings and weekends you really have to think about decompressing spending time with your family spending time with your friends

4. write all the homeworks on your agenda don't wait for the teachers to put the homeworks on the ENT

4. not speak with your friends during the course because you are distracted in class and you don't understand any lessons

un conseil:
enjoying this moment
