What are dental Lumineers?

Dental Lumineers are a product of veneers that are being popular worldwide. They are thin transparent plastic shells applied over the teeth to hide cosmetic issues like stains, chips, or gaps. All are bonded to the front of a tooth, ending the procedure. They are also defined as dental porcelain laminates. It is a powerful way to mold a perfect smile that everyone has always dreamed of. In the case of a busy schedule, make an appointment at the Dental **Clinic Open On Saturday**.

Dental veneers are created with resin composites or porcelain. Each material has its different properties. Porcelain veneers are stain-resistant while composite veneers appear more natural. If you don't have time on working days, visit a [Dentist Office Open On Saturday](#).

Most people these days are very conscious of their appearance and want to look great. Lumineers Houston is dental care orthodontics that is very thin and offers beautiful and shiny

teeth with almost no side effects or problems. You can be benefitted from **Lumineers Service Houston** if you want.

Why Lumineers?

Easy To Use:

The main advantage of Lumineers is that they are very easy to use. Unlike veneers, fixing Lumineers is not at all painful. There is no need to drill or grind your teeth while fixing them. The procedure is very simple in which Lumineers will be just fixed to the natural teeth.

Flexible and Thin:

While installing Lumineers Sunset Hills, there will be no change made to your teeth structure. These instant dental orthopedics are made from polymer that is flexible and as a result, they can be made very thin. The Lumineers just have to be slid over the teeth.

No Need for Replacement

Lumineers have a long life. They can last longer than 20 years. To maintain your smile, you just have to follow basic dental hygiene. The process of installing instant Lumineers is very simple. You will be ready to flaunt your new smile in just a couple of visits.

Procedure Of Lumineers?

Dental Lumineers installation process mainly include three dentists visits:

- **First visit:** During the first visit, the patient makes discussions with your dentist regarding his/her options to get a flawless smile. The dentists take X-rays and impressions of your teeth as well.
- **Second visit:** During the second visit, your dentist will prepare your teeth for the procedure. He/she will determine how much enamel should be removed. After that, your dentist will make an impression of the filled-down teeth. Then the impression will be sent to a dental laboratory where Lumineers are made.
- **Third visit:** The dentist will perform the installation process at this time. He/She will make sure that everything is ok and Lumineers are well fitted.

That's how easy getting dental veneers can be.

How much do Dental Lumineers Cost in Texas?

Lumineers Teeth Cost may range between \$800 and \$2,000 per tooth. Their cost may depend on the case, needs, and location of the patient. Mostly Lumineers are not covered by insurance as they are categorized under cosmetic treatment.
