If you are experiencing a veins problem, chances are there that you have varicose veins. Almost 20% of the adult population experience this medical condition. People often ask several questions to learn more about [varicose vein treatment](#) or to ensure they are suffering from this medical condition.

Below are discussed a few frequently asked questions and their answers

5 FAQs Are Here!

FAQ 1. What do you understand about varicose veins?

Answer. Varicose veins are twisted, bulgy, and untidy veins. This is the situation in which veins of the human body get abnormally enlarged. The varicose veins look like a bunch of grapes that appeared in different colors like blue, purple, or red. **Vein doctor California** states that they are seen on legs and thighs but can easily be found in any part of the body. As the valves of the vein stretch then it will be not able to perform its function properly.

FAQ 2. What is the reason behind varicose veins?

Answer. The problem of varicose veins arises if there is weakness in the walls of the veins. The weekend walls help the vein to get bigger only if the blood pressure in the veins increases. When the valve of a vein stretches at that time it will not be able to perform the way they do. Lethargic blood backs or pools in the vein, lead to cause the vein to swell and twist.

FAQ 3. What is the most common cause of varicose veins?

Answer. If the artificial veins become less powerful than deep veins then they have a chance to become varicose veins. Anything which puts extra pressure on the legs abdomen will lead to varicose veins. The causes of these veins are obesity, pregnancy and remaining standing for long hours. Hence, that is the main reason why everybody is looking for a [vein treatment san Jose](#).

FAQ 4. What are the types of treatment available for varicose veins?

Answer. There are several types of **varicose vein treatment near me** and they are as follows-

- Endovenous Laser Treatment
- Sclerotherapy
- Surgery
- Compression stockings
- Radiofrequency occlusions

FAQ 5. Where should we go for the best and effective **vein treatment san Diego**?

Answer. As we know that the varicose veins are not good for our health. They tend to be hurt less, but the blockage of blood in the legs can sometimes cause severe swelling in the legs and feelings of pain. While if someone is bearing severe pain, then you should need to go for the **veins treatment near me** asap. Majorly there are 2 signs of varicose veins ie; ulcers and skin difficulties. And if you are possessing any of the above signs then you must need to see a **vein specialist California**.
